

Self Adhesive Flange Protector

Application

Our Self Adhesive Flange Protector Discs are able to cover the entire pipe flange surface, to protect against contamination from ingress of Moisture, Sand and Dirt.

Benefits

- Low tack self-adhesive for easy removal and fitting
- Full face flange protection option
- Especially recommended for internally coated flanges
- Stocked in a wide range of standard and non-standard sizes
- Can be used in blasting process

Function

The Self Adhesive Flange Protection Disc is pulled over the entire pipe flange, with enough flexibility and elasticity to provide tension around the flange.

Material Qualities

Material	Soft Industrial Rubber
Hardness	70 shore A
Elasticity at Break	150 %
Tension at Break	5 N/mm ²
Material Thickness	± 1,5 mm

Additional Information

Suitable for ANSI and DIN flanges

Application temperature: -15 °C / +70 °C

Application time: 1 minute per pipe-end
